Cabinet Installer

Job Description: Perform cabinet install, quality control and jobsite cleanliness.

Responsibilities/Duties:

- Able to understand blueprint drawings and written specifications.
- Understand work orders, change orders, and all other related job documents.
- Assist Lead Carpenter on job sites as well as bring discrepancies and special conditions to his attention.
- Ability to use job specific tools to install cabinetry, hardware and trim
- Maintain a safe and clean job site.
- Skilled trades workers buy their own work gear and hand tools. This proves to be an ongoing cost to replace and upgrade tools. The cabinet subcontractor usually provides most power tools, with the possible exception of a screw gun.
- Oversee and assist with deliveries and installation
- Cabinet installers work after the plumbers, electricians and drywall hangers are finished.
- As each day ends, remove all tools and load them onto a truck.
- Measure and cut the bases, pedestals, housing, shelves, doors, drawers and tops. The saw operator measures the wall spaces between appliances or fixtures, then measures and cuts all wood for cabinet parts.
- Assemble the parts and affix them to the walls.
- hang shelves, build pedestals and shells, lay tops and affixes door hinges, drawer slides and handles.
- Tops must be perfectly smooth and level for the counter tops to go on properly. All visible wood must be finished uniformly to the customer's desire.
- Clean up the sawdust, discarded wood and product packaging. Vacuum and dust the work area before leaving each day. The customer or the boss may decide to look in on the job's progress at any time.
- This job description is subject to change as the company grows and needs morph. This position is to be a team player and help in all areas, as needed.
- Manage time clock and clock in and out daily for jobs and breaks
- Report directly to field supervisor
- Maintain a positive, professional and motivated attitude
